Golden, Colo. – (May 19, 2009)
Epilog Laser and Instructables.com are pleased to announce Daniel Reetz, Fargo, N.D., is the grand-prize winner in the Epilog Challenge. Reetz will receive a new Zing 16 Laser engraving/cutting system for his innovative and eco-friendly “DIY High-Speed Book Scanner from Trash and Cheap Cameras”. Reetz’s winning instructable was one of 478 entries in the Epilog Challenge.

“Being a bit of a bibliophile, I wanted to have my books with me everywhere,” Reetz said. “As much as I love the Internet, some of the very best information is still locked up in books new and old, so I set out to make a book scanner that anyone can build, and anyone can afford.”
In January 2009, I made a cheap, simple book scanner and in April I put the complete plans online. Since then, a number of people have built their own scanners and made incredible improvements. This site is a place where we can work together to further the art of DIY book scanners and software.

Breaking with Tradition

x to the future in Air Force Civil Engineering, the emphasis is on
for people—also, all in the one point toward the continuing need
do more with less. We have, in nearly any area, trimmed the fat
ditional methods of operation, but now, even this is not enough.
entering an era of change. A time for finding new ways of doing
novation, breaking with tradition, never known.

An Apology from Amazon

Showing 1-25 of 704 posts in this discussion

Jeffrey P. Bezos says:

This is an apology for the way we previously handled illegally sold copies of 1984 and other novels on Kindle. Our “solution” to the problem was stupid, thoughtless, and painfully out of line with our principles. It is wholly self-inflicted, and we deserve the criticism we’ve received. We will use the scar tissue from this painful mistake to help make better decisions going forward, ones that match our mission.

With deep apology to our customers,

Jeff Bezos
Founder & CEO
