2 The Business of Surveillance
For every way in which electronic technology improves our lives, more sinister applications undermine privacy and threaten human rights, specifically privacy and First Amendment–protected activities. The more we grow to accept that all kinds of information will be transmitted about us in everyday life, the more we accede to the potential abuses of this information.
By Heidi Boghosian

6 Protecting Children's Privacy Online: The Battle Continues
The quest for protection of children's privacy online has been a lengthy one, from the first calls for federal regulation in the 1990s, through the implementation of landmark legislation in 2000, to the new rules going into effect in 2013. But the data collection practices of marketers continue to evolve, and adolescents thirteen and over remain unprotected.
By Kathryn C. Montgomery

7 Protecting Privacy: The Role of the Courts and Congress
The right to privacy is a work in progress. Even if courts and legislatures often look to the other to do the hard work, this article argues that both branches have a significant role to play. As new technologies, new business practices, and new government programs challenge well-established concepts of privacy, neither jurists nor lawmakers can afford to sit on the sidelines.
By Marc Rotenberg and David Brody

11 Warrantless Wiretapping Under the FISA Amendments Act
The Foreign Intelligence Surveillance Act Amendments Act was reauthorized without a single substantive amendment, despite valiant efforts by a small group of committed lawmakers to draw public attention to the law's serious privacy implications and to attain greater public accountability with how the law operates.
By Mitra Ebadolahi

12 Employment Privacy: Is There Anything Left?
While employers can monitor every e-mail, text message, and Web site visit on a company-owned device, personal conversations at work and video recording are legally protected. Other topics explored in this article include audio monitoring, video surveillance, laptops, webcams, GPS, biometrics, social network monitoring, and password disclosure.
By Lewis Maltby

17 Upending Human Dignity and Shattering the Fourth Amendment: Strip Searches
While strip searches span a broad spectrum of scenarios, the common denominator remains humiliation and degradation at the hands of government officials and a complete disregard for privacy. If we are to make any progress in restoring, let alone securing, our Fourth Amendment rights, we must begin by ensuring that human dignity stands alongside privacy as a primary animating principle of the Fourth Amendment.
By John W. Whitehead

22 Privacy in Hollywood?
There is a long history in Hollywood of dramatizing illicit invasions of privacy. At its core, the best of this entertainment raises important questions about human individualism, independence, and privacy.
By Alexander Wohl

26 Human Rights Hero: Senator Ronald Lee Wyden
Senator Wyden—with support from other senators—seems the lone governmental sentinel standing guard between the American people and abuse of government surveillance absent vigilant oversight.
By Wilson Adam Schooley
